

**León-Palmero, 2023. Understanding the fluxes of greenhouse gases in reservoirs under the inspiration of Margalef. *Limnetica*, 42 (2), 2023**

**SUPPLEMENTARY MATERIAL**

**Table S1.** Location, construction year, and morphometric description of the study reservoirs. Further information on the data and indexes provided in the table can be found in in León-Palmero et al. (2020b). *Localización, año de construcción y descripción morfológica de los embalses estudiados. Puede encontrarse más información sobre los datos y los índices que se presentan en la tabla en León-Palmero et al. (2020b).*

Reservoir	Latitude, longitude (°, decimal degrees)	Altitude (m)	Construction year	Reservoir area (km <sup>2</sup> )	Reservoir volume (hm <sup>3</sup> )	Mean depth (m)	Shoreline development index (DL)	Shallowness index (m <sup>-1</sup> )
Cubillas	37.27, -3.68	640	1956	1.94	18.74	9.66	2.00	0.21
Colomera	37.40, -3.72	810	1990	2.76	40.18	14.56	3.35	0.23

**Table S3.** Daily gross primary production (GPP), daily net ecosystem production (NEP), and daily respiration (R) rates measured during the stratification period as O<sub>2</sub> production (gO<sub>2</sub> m<sup>-3</sup> d<sup>-1</sup>) and C production (gC m<sup>-2</sup> d<sup>-1</sup>) in the epilimnion of the study reservoirs. A further description on the methodology can be found in León-Palmero et al. (2020b). *Tasas diarias de producción primaria bruta (PPB), producción neta (PN), y respiración (R) medidas durante el periodo de estratificación como producción de oxígeno (gO<sub>2</sub> m<sup>-3</sup> d<sup>-1</sup>) y producción de C (gC m<sup>-2</sup> d<sup>-1</sup>) en el epilimnion de los embalses estudiados. En León-Palmero et al. (2020b) se describe la metodología en detalle.*

Reservoir	O <sub>2</sub> production in the water column (gO <sub>2</sub> m <sup>-3</sup> d <sup>-1</sup> )			C production in the water column (gC m <sup>-2</sup> d <sup>-1</sup> )		
	GPP	NEP	R	GPP	NEP	R
